

A Friend Named Effy

Johnathan has a special friend named Effy, who lives inside his body. Usually they get along well enough, but on occasion Effy decides to act up and hurts Johnathan, making him feel bad.

What is the best way to deal with such a friend?

"A Friend Named Effy" was written for you, children who suffer from FMF (Familial Mediterranean Fever). Johnathan and Effy are here to remind you the most important lesson: Even when things are hard, you have your imagination on your side, and that is the best thing in the world.

We hope that you enjoy this book and its enchanting illustrations.
